Software Engineer with 3 years of experience developing web applications, analytics platforms, API-driven solutions, and AI-enabled features. Strong experience with React.js, Next.js, Node.js, REST APIs, and JavaScript, with hands-on exposure to Python-based RAG systems, knowledge bases, document chunking, and vector databases. Experienced in translating business requirements into scalable technical solutions, integrating third-party APIs, and collaborating across teams to deliver production-ready features.

Technical Skills

Languages: JavaScript (ES6+), Python, TypeScript (Basic), HTML5, CSS3
Backend & APIs: Node.js, RESTful APIs, PostgreSQL, API Integration, Postman
AI & Data: RAG, Knowledge Bases, Vector Databases, Generative AI, OpenAI API
Frontend: React.js, Next.js, React Native, Tailwind CSS, CSS Modules, Responsive Design
Cloud & Tools: GCP, Git, GitHub, Chrome Extension APIs, AWS, Linux.

Professional Experience

Software Engineer **May 2026 – Present**
Enterprisebot – Bengaluru, India

- Worked on Retrieval-Augmented Generation (RAG) systems using Python, gaining hands-on understanding of document retrieval workflows and AI-powered knowledge systems.
- Worked with DocBrain knowledge bases (KBs), understanding how documents are processed, organized, and made available for retrieval within RAG workflows.
- Gained practical understanding of document chunking strategies and how chunked content is prepared for efficient retrieval and downstream AI processing.
- Developed an understanding of vector databases and their role in storing and retrieving relevant document information for RAG-based applications.

Software Engineer — Frontend **February 2024 – April 2026**
AdSpyder (GSTECH Technology Pvt Ltd) – Bengaluru, India

- Led development and optimization of Next.js landing pages, improving performance, SEO rankings, and overall user experience.
- Designed and delivered interactive analytics dashboards using React.js, integrating GA4 and Search Console APIs to improve data visibility and decision-making.
- Owned and developed a reusable component system using React.js and Tailwind CSS, improving UI consistency and accelerating feature development across the product.
- Implemented AI-driven features using OpenAI GPT-4, enabling users to generate ad creatives and enhancing overall product capability.
- Worked closely with designers to refine UI/UX and improve usability, translating mockups into responsive, pixel-accurate interfaces across browsers.
- Proactively identified and resolved UI/UX issues through cross-browser testing, ensuring consistent user experience across Chrome, Firefox, and Safari.
- Identified UI inconsistencies and proposed improvements to enhance user experience and interface clarity.
- Participated in Agile sprints, conducted code reviews on GitHub, and maintained Git branching workflows.

Chrome Extension Developer Intern **August 2023 – January 2024**
AdSpyder (GSTECH Technology Pvt Ltd) – Bengaluru, India

- Developed and published Dark Mode for Google Docs on the Chrome Web Store, acquiring 40,000+ active users and 155 ratings (3.5/5), making it a featured extension in the Workflow & Planning category.
- Built and shipped Roblox Friend Manager, a Chrome extension leveraging Roblox's official API with CSRF protection and infinite scroll support, adopted by 678+ users within weeks of launch.
- Integrated and optimized RESTful APIs for real-time data fetching, improving data reliability and frontend performance.
- Manually tested extension functionality across multiple Chrome versions to ensure consistent behavior and cross-version compatibility.
- Participated in daily standups, sprint planning, and code reviews, rapidly picking up extension development best practices.

Projects

Omni-Channel Analytics Dashboard *React.js, Next.js, Node.js, GA4 API*

- Owned the design and development of a responsive analytics dashboard, enabling real-time visualization of multi-platform ad performance data.
- Integrated GA4 and Search Console APIs for real-time data updates; implemented lazy loading for improved performance.
- Ensured cross-browser compatibility and mobile responsiveness across the dashboard UI.

AI-Orchestrated Mobile Application Suite *React Native, GPT-4, Prompt Engineering*

- Built cross-platform mobile applications using React Native with reusable UI components across multiple product flows.
- Translated business requirements into structured UI feature flows and used GPT-4 to accelerate parts of the development process.

AI-Driven Creative Ad Generator *Node.js, OpenAI API, React.js*

- Built a user-facing interface for generating personalized ad creatives, integrating GPT-4 and vector search via REST API.
- Implemented responsive UI components and handled API integration end-to-end on the frontend.

Distributed Ad Data Ingestion System *Node.js, Puppeteer, PostgreSQL*

- Contributed to backend data pipelines processing large volumes of ad data, supporting real-time availability for frontend dashboards.
- Worked on data parsing and query optimization to improve data delivery speed for the analytics UI.

Education

Bachelor of Engineering in Computer Science
BIET, Davangere CGPA: 7.75

Pre-University (PCMC's)
Sir M V College, Davangere 82.1%
